What elements or methods will you use to accomplish
“Play/Pause/Stop/Skip songs” ?

On our website the functionality to play a song, pause a song, stop a song, and skip a song is going to be the same. Because the functionality is similar we will implement a simple click method to handle these tasks. Icons will be implemented to distinguish between each function, and allow users to easily recognize familiar symbols.

What elements or methods will you use to accomplish “Love a song” ?

The ability to “love a song,” allows the user to personalize his/her radio listening experience. The heart icon will be used as the “love a song” button; when a user clicks the heart it will illuminate.

What elements or methods will you use to accomplish “Turn the volume up on songs” ?

The ability to turn adjust the volume of the playback, allows the user to determine how loud he/she listens to music. A scroll bar and speaker icon will be used, to allow users to manually adjust how high or low to playback music.
