      a)   Skip

      b)   Up Next

      c)   Previous

      d)   Volume

iii) How will you handle user errors?

Errors in our website might consist of if the song stops playing some a particular reason, if the user searches for a song, artist or genre that's not available, if the user experience connection issues, etc. When these errors arise, a pop-up message will display to let the user know that an error has appeared. In addition, the pop-up message shall display varies ways to remove the error; whether that's to refresh the page, connect to the Internet, search for songs, artists, or genres listed, etc.
